

Lord Browne of Ladyton  
House of Lords  
London  
SW1A 0PE  
8 March 2011

Ms. Rosie Houldsworth,  
TalkWorks,  
Overford Farm,  
Wytham,  
Oxford OX2 8QN

*Rosie*  
I write to confirm that, as Convener of the Top Level Group on Multilateral Nuclear Disarmament and Non-Proliferation (TLG), I have worked with you and the TalkWorks' films initiative over the last eighteen months, and to provide you with a letter of endorsement and recommendation, based on that experience.

Several members of the TLG have been interviewed by TalkWorks about issues connected to nuclear disarmament, non-proliferation and the Obama agenda. In addition, other members of the group undoubtedly will agree to be filmed by TalkWorks in the future.

Members of the TLG group have been keen to participate and cooperate with TalkWorks because we value your work and effort. Your films are of extremely high quality and film has proved an excellent medium to disseminate the message of nuclear disarmament and non-proliferation to a wider audience.

A very important development of the work of the TLG has been the promotion of a network of political leaders across Europe, including Russia, to advocate for and to promote the disarmament agenda. The work of the European Leadership Network for Multilateral Disarmament and Non-Proliferation (ELN) is explained best by logging on to our website: [www.europeanleadershipnetwork.org](http://www.europeanleadershipnetwork.org). We expect that in the not too distant future, the members of the ELN will also agree to be interviewed by Talkworks.

In order to build awareness of these highly important issues, it is vital that this message gets broadly publicized and TalkWorks' films can play a key role in the UK and wider European debate by assisting this process.

Any further support and assistance that could be given to TalkWorks would be of benefit to furthering this agenda. We support your work and will continue to co-operate and work with TalkWorks in the future.

*Lord Browne*  
Rt Hon Lord Browne of Ladyton
